Manage Application: A320 Failure Console Dev

Name

Displayed to users when authorizing your application.

A320 Failure Console Dev

OAuth Redirect URI

Will receive the result of all client authorizations: either an access token or a failure message. This must exactly match the redirect_uri parameter passed to the authorization endpoint.

When testing locally, you can set this to http://localhost.

http://a320failureconsole2.azurewebsites

Application Category

Game Integration ▼

Client ID

Passed to authorization endpoints to identify your application. You cannot change your application's client id.

di0bbvpfaazzscjtejfr1i19twqvd6

Client Secret

Passed to the token exchange endpoints to obtain a token. You must keep this confidential.
